GEOTECHNICAL SOLUTIONS

Slabjack Geotechnical

THE PROBLEM

Deteriorating infrastructure is a multi-billion dollar problem for local, state and federal entities. For industry it costs not only hundreds of millions of dollars, but the unacceptable inconvenience and expense of lost production.

THE SOLUTION? SLABJACK GEOTECHNICAL POLYMER INJECTION

Through the use of Geotechnical polymers, Slabjack Geotechnical seals leaking concrete ditches, culverts and large diameter pipes. Under-seals large concrete slabs (raise if necessary) such as warehouses, parking lots and bridge approaches and stabilizes bulkheads, seawalls and more.

Many projects are done in hours not days. With the capability of bringing multiple rigs to the job site, we make quick work out of large projects like huge warehouse slab stabilization projects, long runs of trench break foam or curtain walling culverts and sealing large diameter pipe and ditches. Slabjack Geotechnical is well qualified to handle a wide range of industrial and municipal projects.

WHAT WE DO

CULVERT, LARGE DIAMETER PIPE AND
DITCH SEALING/CURTAIN WALL

SLAB STABILIZATION AND
UNDER-SEALING

VOID FILLING, VESSEL AND PIPE
DECOMMISSIONING

SEALING/STABILIZING BULKHEADS
AND SEAWALLS

SOIL STABILIZATION/CHEMICAL
GROUTING

POLYURETHANE PRESSURE GROUTING

CONCRETE ROADS AND BRIDGE
APPROACH RAISING

POLYURETHANE TRENCH BREAKS

SLAB LIFTING

JOINT SEALING
(POLYUREA, POLYURETHANE AND SILICONE)

CONCRETE POOL RAISING

AND MORE.

We have access to an unlimited number of polymer densities and reactivities; hydrophobic, hydrophilic, incredibly fast rise or unbelievably slow for every possible need to best fit the parameters of your project.

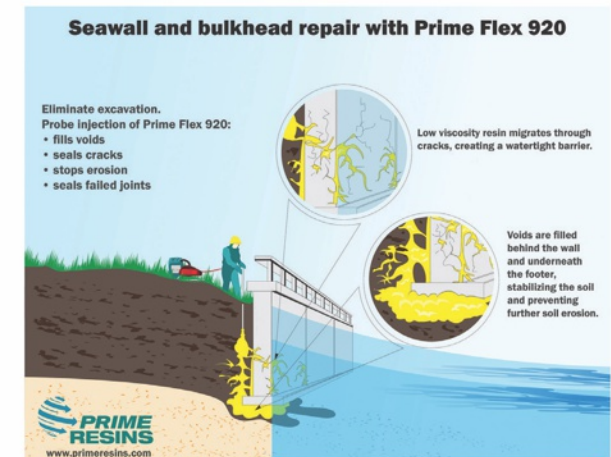

OUR QUALIFICATIONS

Slabjack Geotechnical has been solving Geotechnical problems since 2011 and includes well over one thousand successful projects in the northwest.

With our associated partners NCFI, SPI and Prime Resins, we have the expertise to handle projects large and small.

Using polyurethane grouts exclusively since 2011 to;

- RAISE AND LEVEL CONCRETE SLABS
- SEAL LEAKY CULVERTS AND LARGE DIAMETER PIPES.
- STABILIZE ROCKING WAREHOUSE FLOORS, PARKING LOTS AND ROADS.
- LEVEL TANKS, SILOS AND BINS.
- STABILIZE SEAWALLS AND BULKHEADS AND MUCH MORE.
